CAREER PERSPECTIVES

Be inspired by the creative and deeply innovative efforts the department delivers year in, year out. Our line of work continues to make its mark on industry as our teachers; researchers and graduating students establish excellence throughout the IT fields. The department has grown its programs to extend across business information systems, networking, cyber security, data science, programming and software development, web design and development, as well as game design and development. For those with wider interests, we also focus on innovation and entrepreneurship. Our department is reflective of our active and thriving broader community that covers interests across a diverse selection of computing areas. From language technology, cryptography, security, programming languages, advanced databases, big data analytics, cloud computing, artificial intelligence, knowledge systems and optimization techniques, our focus remains fixated on achieving teaching excellence to both undergraduate and postgraduate students. Supported by our many inter-departmental collaborations and industry engagements, the Department of CSE at KCG campus is committed to continue to provide endless opportunities for all involved.
