# KCG
## COLLEGE OF TECHNOLOGY
( A Unit of Hindustan Group of Institutions )

**IoT**

# AI and IoT Powered Solutions to Advance Health Care Innovations
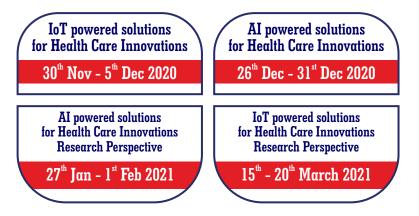

## About the Programme:

- Internet of Things has numerous applications in healthcare, from remote monitoring to smart sensors, medical IoT implants and medical device integration.
- In addition, the increasing availability of healthcare data and rapid development of big data analytic methods has made possible the recent successful applications of AI in healthcare.
- This STTP provides faculty, with a principle-based understanding of AI/IoT and the Confluence of AI and Smart IoT Devices for healthcare solutions.
- Participants will benefit by knowing about the extensive research and methodologies developed in these fields by various industries, international hospitals and researchers.

### Organised by
**Department of Electronics and Communication & Research Forum**
