

ABOUT THE PROGRAMME

Engineering drawing is the graphical representation of physical objects and their relationship. The ability to read drawing is the most important requirement of all technical people in engineering profession.

The faculty attending this programme will benefit by learning efficient teaching methods on this subject and thus improving to teach the fundamentals of the subject to the students more confidently.

The objectives of conducting this programme are:

- To improve the teaching skill of the faculty members; so they can help students understand this subject easily.
- Students will be able to improve their visualization skills so that they can apply these skills to learn basic engineering drawing formats.
- To understand the basic "Auto CAD" skills.
